

Barangay Balong Bato — Integrated Information Systems

Gawad BIS (Barangay Integrated System) + **BHC** (Barangay Health Center System)

Patient registry, multi-station queues, clinical workflow, and barangay resident records — integrated for Barangay Balong Bato, San Juan City.

Documentation

All guides are in the **docs/** folder.

Start here	Description
docs/README.md	Documentation index (full list)
docs/USER_GUIDE.md	BHC user guide — queues, clinical workflow, doctor portal
docs/INTEGRATED_USER_GUIDE.md	Gawad BIS ↔ BHC integration guide
docs/SOURCE_CODE_AND_DOCUMENTATION.md	Source code & technical documentation

Systems at a glance

	Gawad BIS	BHC System
Stack	ASP.NET Core 8, MongoDB	PHP 8+, MySQL
Local URL	http://localhost:5003	http://localhost/bhc_system/public
Primary data	Residents, permits, medicine inventory	Patients, queues, clinical records

Integration: SSO, resident prefill, staff sync, read-only medicine catalog from Gawad.

Quick start (development)

1. Start MongoDB and Gawad BIS (**dotnet run** on Client project).
2. Start XAMPP (Apache + MySQL).
3. Copy `config/gawad_integration.local.example.php` → `config/gawad_integration.local.php`.
4. Open Gawad → Residents → **Register at Health Center**.

Default BHC login: **admin** / **admin123** (change before production).

Project structure (BHC)

public/index.php	Entry point + routes
config/	App, database, Gawad integration
core/	Router, auth, Gawad integration classes
controllers/	HTTP handlers
models/	Database access
views/	UI templates
docs/	All documentation and user guides
database_schema.sql	MySQL schema reference

Gawad BIS is a separate .NET solution ([Project.Gawad.sln](#)) — see [docs/SOURCE_CODE_AND_DOCUMENTATION.md](#).
