

Documentation — Barangay Integrated System

Gawad BIS + Barangay Health Center (BHC) System

Barangay Balong Bato, San Juan City

All guides and documentation for this project are in this [docs/](#) folder.

User guides

Document	Audience	Description
USER_GUIDE.md	BHC staff, doctors, admins	Full BHC operations: queues, clinical workflow, doctor portal, appointments, reports, displays
INTEGRATED_USER_GUIDE.md	Barangay staff, health workers	Gawad BIS ↔ BHC integration: SSO, Register at Health Center, staff import, medicine sync

Process & diagrams

Document	Audience	Description
WORKFLOW_SUMMARY.md	Supervisors, trainers	End-to-end process overview and ticket lifecycle
WORKFLOW_DIAGRAM.md	All	Mermaid workflow diagrams and export instructions
workflow-diagram.mmd	—	Mermaid source: full visit workflow
ticket-lifecycle.mmd	—	Mermaid source: ticket state machine

Technical & deployment

Document	Audience	Description
SOURCE_CODE_AND_DOCUMENTATION.md	Developers, IT, thesis reviewers	Architecture, source tree, APIs, database, configuration
DEPLOY_INFINITYFREE.md	IT / deploy	BHC hosting on InfinityFree
MySQL schema (database_schema.sql)	Developers	At project root (not in docs/) — described in SOURCE_CODE_AND_DOCUMENTATION.md

Quick start (local development)

System	URL
Gawad BIS	http://localhost:5003
BHC	http://localhost/bhc_system/public

1. Start Gawad BIS and XAMPP (Apache + MySQL).
2. Copy `config/gawad_integration.local.example.php` → `config/gawad_integration.local.php`.
3. Match integration keys in Gawad `appsettings.json` and BHC config.
4. Gawad → Residents → **Register at Health Center**.

Default BHC admin (first install): `admin` / `admin123` — change before production.

Export to PDF

Open any `.md` file in Microsoft Word (*File* → *Open* → *Save as PDF*) or use a Markdown PDF extension in VS Code. Use UTF-8 encoding.

Documentation package — June 2026
