

BHC System - Mermaid Workflow Diagrams

Use these diagrams in [Mermaid Live Editor](#) for a clean, interactive view and to **export PNG or SVG** (higher quality than a hand-drawn image).

How to generate a diagram (recommended)

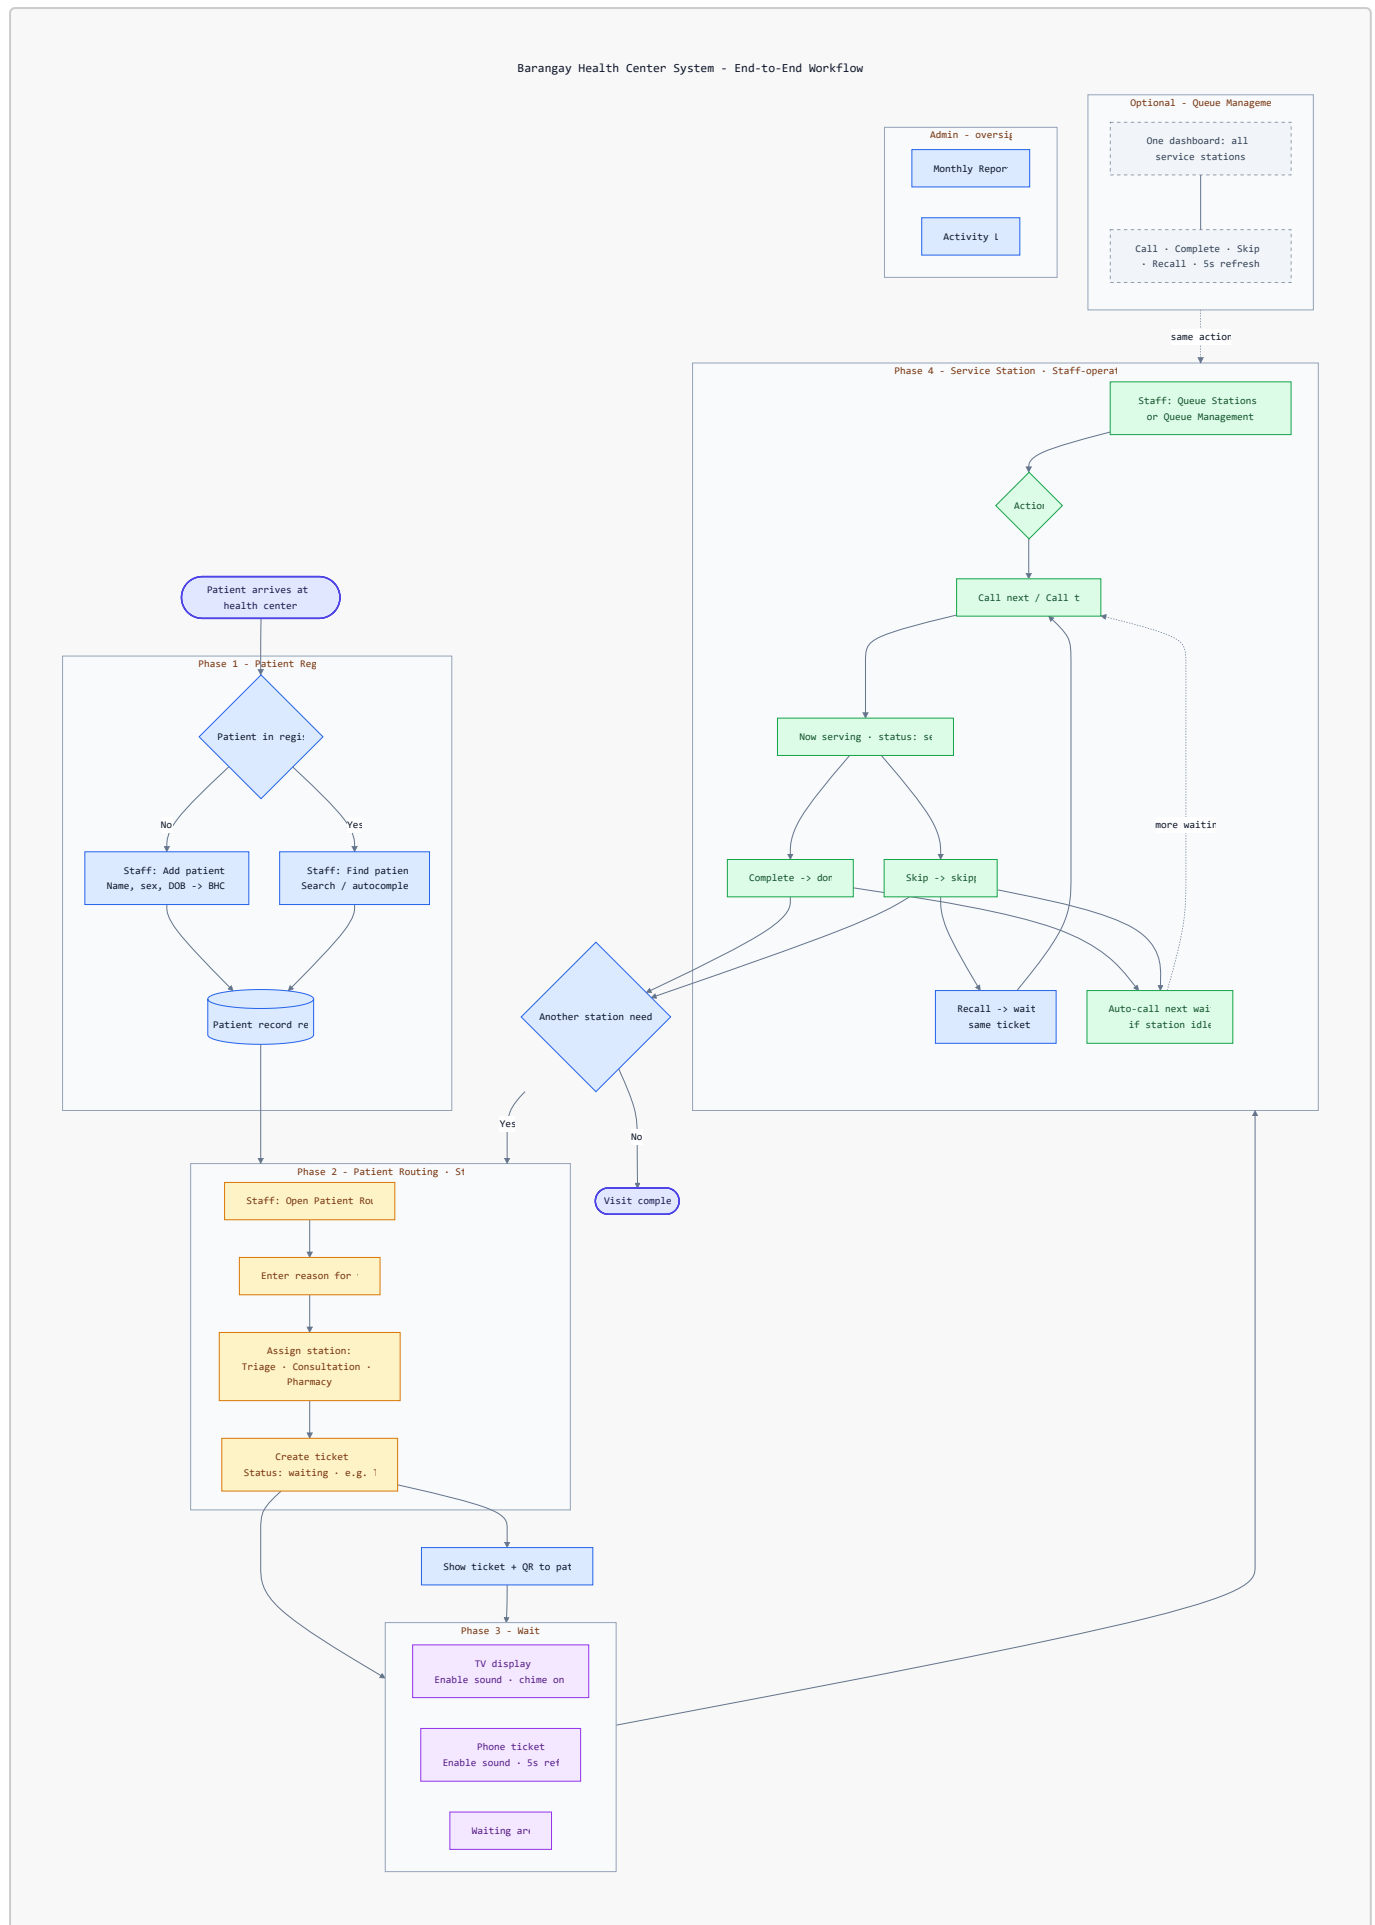

1. Open <https://mermaid.live>
2. Copy the contents of one of the source files:
 - **Full visit workflow:** `workflow-diagram.mmd`
 - **Ticket statuses only:** `ticket-lifecycle.mmd`
3. Paste into the editor (left panel). The preview updates on the right.
4. Use **Actions** -> **PNG** or **SVG** to download.
5. Optional: **Actions** -> **Copy PNG** for slides or documents.

In VS Code / Cursor: Install the *Mermaid* extension, open a `.mmd` file, then use **Preview** or export from the preview.

On GitHub: Paste a ```mermaid` block (see below) in any `.md` file; GitHub renders it automatically.

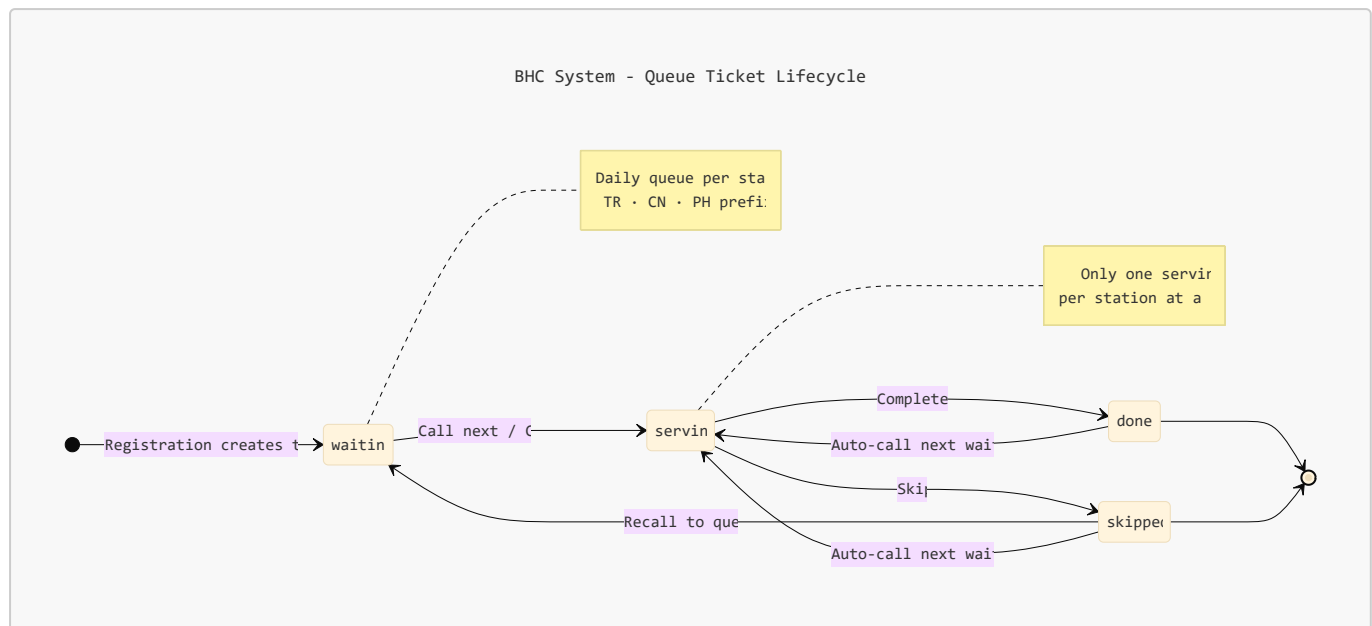

1. End-to-end visit workflow (main diagram)

Best for training, proposals, and posters. Shows registry -> routing -> waiting -> station service -> optional return to routing.

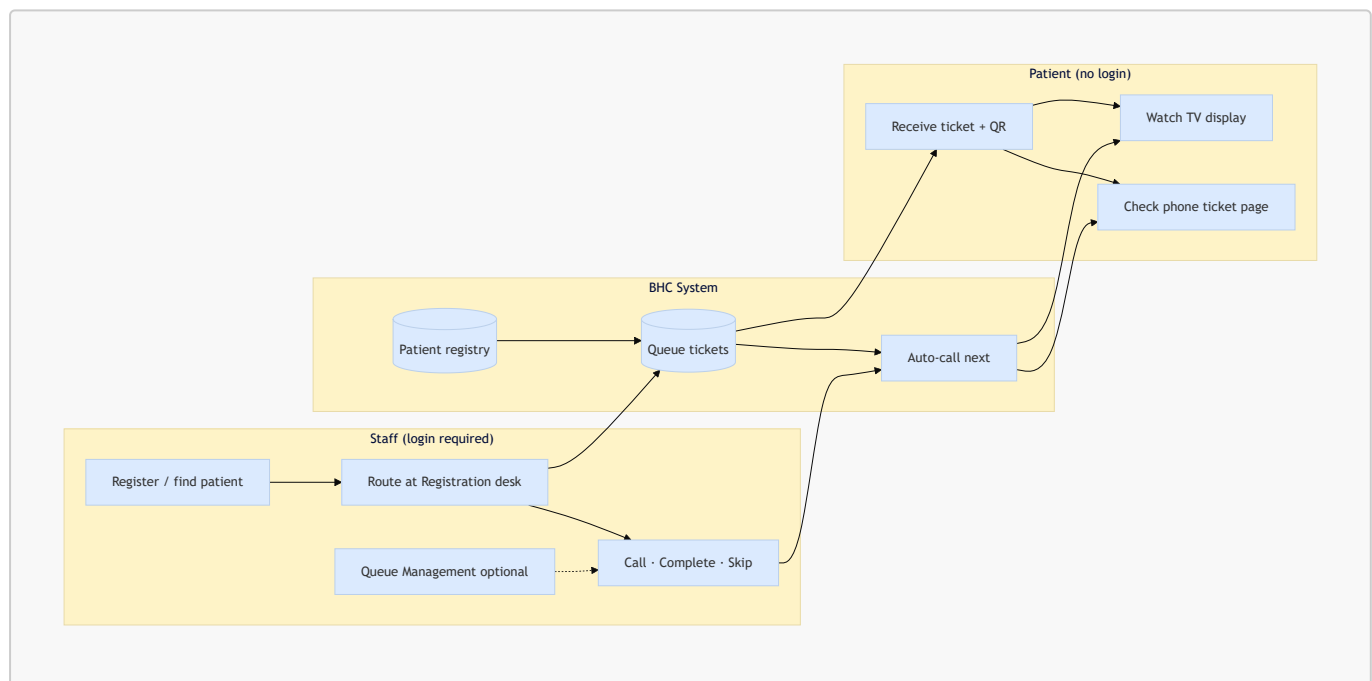

2. Ticket lifecycle (compact)

Best for explaining queue statuses to staff.

3. Swimlane view (staff vs patient)

Simpler diagram for quick presentations.

4. Replace the PNG in guides

After exporting from Mermaid Live:

1. Save the PNG or SVG alongside these docs (e.g. [workflow-diagram.png](#) in this folder) **or** embed in your thesis/submission package.
2. Update any references in [USER_GUIDE.md](#) and [WORKFLOW_SUMMARY.md](#) if you use a custom filename.

The original hand-drawn PNG can stay as a backup; Mermaid exports are usually sharper for print and slides.

Files in this project

File	Purpose
<code>workflow-diagram.mmd</code>	Full workflow - paste into mermaid.live
<code>ticket-lifecycle.mmd</code>	Ticket state machine
<code>WORKFLOW_DIAGRAM.md</code> (this file)	Diagrams + instructions
<code>WORKFLOW_SUMMARY.md</code>	Written process summary
<code>INTEGRATED_USER_GUIDE.md</code>	Gawad BIS ↔ BHC integration guide
<code>SOURCE_CODE_AND_DOCUMENTATION.md</code>	Technical documentation
<code>DEPLOY_INFINITYFREE.md</code>	Deployment guide
<code>README.md</code>	Documentation index

Tips for a better-looking export

Tip	How
Larger text	In mermaid.live, zoom preview before PNG export, or increase <code>fontSize</code> in the YAML header
Wider layout	Use <code>flowchart LR</code> instead of <code>TB</code> for left-to-right posters
Dark background	mermaid.live -> Configuration -> pick theme <i>dark</i> or <i>forest</i>
PDF for printing	Export SVG , open in browser or Inkscape -> Print to PDF
Embed in Word	Export PNG at 2× zoom for crisp print

Diagrams match BHC System: Patient Routing, Queue Management, auto-call on Complete/Skip, QR tickets, displays, Monthly Reports, Activity Log.
